Simplified Embroidery

Melco Machine Compatibility

- EMT16X
- EMT16 PLUS
- EMT16
- AMAYA XTS
- AMAYA XT
- BRAVO

The Solution for Common Embroidery Challenges is Here!

Value

Melco Fast Clamp PRO replaces thousands of dollars of other specialty frames and hoops. This is one very efficient, valuable system that does the job of many!

Difficult to Hoop Items

Melco Fast Clamp PRO is a CLAMP, not a frame or hoop! Simply mount and adjust the clamp to your Melco embroidery machine, and you're ready for embroidery on dozens of products that would have been difficult or impossible with other systems.

Examples include:

- Shoes
- Pockets
- Shirt Collars
- Hats
- Car Mats
- Pet Collars or Leashes
- Bag Straps
- Flip Flops or Sandals
- Backpacks
- Tote Bags

Versatility

Melco Fast Clamp PRO comes with three clamp arm lengths to expand the range of products you can produce. Also, adjustable clamp height allows for embroidery on material of varying thickness.

Ultra-Precise Embroidery

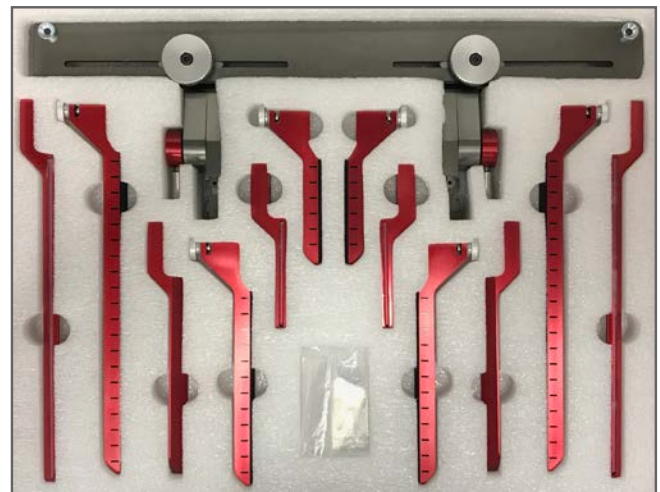

Precise embroidery application is very easy with this clamping system, as opposed to traditional hoops or frames. This is because you can make small adjustments to the material position and tension, while it is on the machine. Just clamp one side, hold the other side in the desired position and tension, then clamp down. Double-check for accuracy using Auto Trace, and you're ready to sew!

Increased Sew Field

Melco Fast Clamp PRO is open on the front end, (along the Y-Axis) allowing for embroidery deep into pockets, or close to the edge of a dog collar or bag strap.

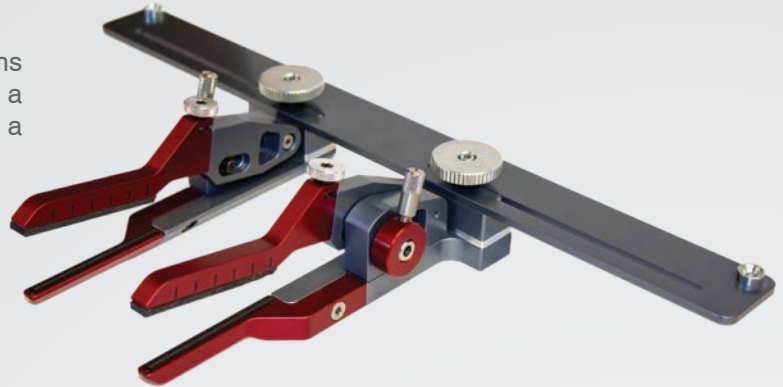

Enhanced Stitch Quality & Efficiency

Most current hooping or framing systems leave space between the fabric and needle plate. This space allows the fabric to move up and down with the needle, also called "material flagging". Material flagging is a cause for poor embroidery quality, thread breaks, missed stitches, and numerous other problems. With Melco Fast Clamp PRO, the fabric is properly positioned and tensioned to avoid material flagging completely, thereby improving stitch quality, and production efficiency.

Do More With Less

The versatility of the Melco Fast Clamp Pro means that with this single accessory, you can now do a huge variety of jobs that would normally require a whole cabinet of clamps and specialty hoops. Put the Melco Fast Clamp Pro in your toolbox and discover all the ways it can expand your opportunities, save you money and transform the way you do embroidery.

Replace all this speicalty equipment with a single Melco Fast Clamp Pro to save over \$1400

FRAME SYSTEM

SMALL Chassis	\$204.95
2.5" x 4" Window (6.3 cm x 10.1 cm)	\$109.95
